Subject: FW: Vol100WS: concordance analysis

Dear participants,

Thank you all for responding to the 'Doodle' to fix a date for a teleconference to discuss the Concordance analysis. In view of the different availabilities of several participants we propose to block the time slots 6-7 pm (Lyon time) on 11 June and on 22 June, so as to reach as many of you as possible. We thank those who have provided written comments and queries on the Concordance document (attached again), and we urge others to do the same by June 6, so that we can collate the comments and send them around to everyone before we meet on the phone.

The teleconferences will be held via GotoMeeting. You will find the login information for the 1st one below. The login information for the second one will follow at a later stage.

We hope to hear from you all!

With my best regards,

Robert

Lyon (France)	Thursday, 11 June 2015, 18:00:00 CEST UTC+2 hours
Raleigh (U.S.A. - North Carolina)	Thursday, 11 June 2015, 12:00:00 EDT UTC-4 hours
San Francisco (U.S.A. - California)	Thursday, 11 June 2015, 09:00:00 PDT UTC-7 hours
Corresponding UTC (GMT)	Thursday, 11 June 2015, 16:00:00

Lyon (France)	Monday, 22 June 2015, 18:00:00 CEST UTC+2 hours
Raleigh (U.S.A. - North Carolina)	Monday, 22 June 2015, 12:00:00 EDT UTC-4 hours
San Francisco (U.S.A. - California)	Monday, 22 June 2015, 09:00:00 PDT UTC-7 hours
Corresponding UTC (GMT)	Monday, 22 June 2015, 16:00:00

Monograph 100+ 1st teleconference

Please join my meeting from your computer, tablet or smartphone.

<https://global.gotomeeting.com/join/364134237>

Joining via the below web-link is preferable and free of charge.

If possible, please use a headset rather than internal microphones and speakers. If not, please mute them when you are not speaking to avoid echoes.

Subject: RE: Vol100WS: concordance analysis

Hi,

In order to fix the most suitable time for the 1st teleconference, we would be grateful if you would kindly fill in your availability on the following doodle link:

<http://doodle.com/ig7nph8hk657u7r9>

For your information:

Lyon (France) hours	Wednesday, 10 June 2015, 16:00:00 CEST UTC+2
Raleigh (U.S.A. - North Carolina) hours	Wednesday, 10 June 2015, 10:00:00 EDT UTC-4
San Francisco (U.S.A. - California) hours	Wednesday, 10 June 2015, 07:00:00 PDT UTC-7
Corresponding UTC (GMT)	Wednesday, 10 June 2015, 14:00:00

Fred, if you don't have access to the doodle: the proposed times are 9, 10 and 11 your time on 10, 11, 22, 23, 24 and 25 June.

With best regards,

Helene

Subject: Vol100WS: concordance analysis

Importance: High

Dear participants in the IARC Vol. 100 Workshops,

This is to give you an important update on the project 'Tumour-site Concordance and Mechanisms of Carcinogenesis', which was initiated during the two Workshops organized by the IARC in 2012, and to plan with you a decisive conference call on the concordance results.

As some of you have noticed, Bernard Stewart and I are making good progress with the final editing of the Chapters that many of you have contributed for the forthcoming IARC Scientific Publication. Unfortunately, the bio-statistical analyses of the data on concordance and mechanisms have met with serious delay during the past year, but I am pleased to send you herewith attached the results of the re-analysis of the concordance data, as provided by Dan Krewski and his team.

Please remember that from the beginning of this project the idea was to develop the concordance analysis and the interpretation of the results into a consensus statement of the Workshop participants. Therefore, we request to receive within two weeks your major comments on the attached document, and main suggestions for improvement. Based on your comments IARC will prepare the agenda for a GoToMeeting conference call.

We expect the results of the bio-statistical analyses of the mechanistic information to follow shortly. As soon as we have received these results and their interpretation, we will proceed in a similar manner to organize another GoToMeeting.

In any case, the IARC Scientific Publication with your individually authored chapters will be finalized and published this summer. Given this timeline we will not ask chapter authors to revise their chapters by taking into account results of the concordance analysis.

We hope that we can now quickly finalize together this important project and that the product will meet all your scientific expectations.

Later today you will receive a 'Doodle' to fix a date and time slot for the first conference call.

With my best regards,

Robert
